

Title of Study: Utilization of a mobile decision support tool to aid sick day management in children with diabetes.

Consent to be part of a Research Study
To be conducted at
The University of Texas Southwestern Medical Center
Children's Medical Center of Dallas and any of its affiliated entities

Study Doctor's Information

Name:	Soumya Adhikari, MD
Contact Number:	(214) 456-5959
Site Name:	UTSW / Children's Health
Site Mailing Address:	2350 N Stemmons Fwy. Dallas, TX 75207
Emergency Number:	(214) 456-5959
Study Coordinator:	Yasmin Molina
Study Coordinator Email:	yasmin.molina@childrens.com

Key Information about this Study

You are being invited to participate in a research study conducted by the Division of Pediatric Endocrinology at Children's Health. The purpose of this study is to evaluate the effects of using a mobile application, called the "Diabetes and Endocrinology Advisor" designed to help manage sick days in children with diabetes.

The main goal of this study is to see if using the "Ketone Advisor" feature of the Diabetes and Endocrinology Advisor 2.0 app can help parents make better decisions when their child is sick. We want to find out if this app can help make sick days safer for children with diabetes by reducing serious problems like Diabetic Ketoacidosis (DKA).

Before agreeing to participate, it is important that you understand what the study involves, the potential risks, and the benefits. If you and your child decide to take part, there is no guarantee that your child will personally benefit from participation in this study.

Information about this form

Enrolling Children or Incompetent Adults

If you are providing consent for someone else, for example your child, your next-of-kin or someone for whom you are the legal guardian or are designated as a surrogate decision maker on a medical power of attorney, please note that in the sections that follow, the word "you" refers to the person you are providing consent for.

You may be eligible to take part in a research study. This form gives you important information about the study.

Please take time to review this information carefully. You should talk to the researchers about the study and ask them any questions you have. You may also wish to talk to others (for example, your friends, family, or a doctor) about your participation in this study. If you decide to take part in the study, you will be asked to sign this form. Before you sign this form, be sure you understand what the study is about, including the risks and possible benefits to you.

Please tell the researchers or study staff if you are taking part in another research study.

Your doctor is a research investigator in this study. The investigator is interested in both your medical care and the conduct of this research study. At any time, you may discuss your care with another doctor who is not part of this research study. You do not have to take part in any research study offered by your doctor.

Voluntary Participation - You do not have to participate if you don't want to. You may also leave the study at any time. If you decide to stop taking part in this research study, it will not affect your relationship with the UT Southwestern staff or doctors. Whether you participate or not will have no effect on your legal rights or the quality of your health care.

Title of Study: Utilization of a mobile decision support tool to aid sick day management in children with diabetes.

If you are a medical student, fellow, faculty, or staff at the Medical Center, your status will not be affected in any way.

General Information – “Who is conducting this research?”

Principal Investigator

The Principal Investigator (PI) is the researcher directing this study; the PI is responsible for protecting your rights, safety and welfare as a participant in the research. The PI for this study is Soumya Adhikari, MD, Department of Pediatrics at UT Southwestern Medical Center.

Purpose – “Why is this study being done?”

You are asked to participate in this research study of this mobile decision support tool, “Diabetes and Endocrinology Advisor.”

The researchers hope to learn whether using the "Ketone Advisor" feature of the Diabetes and Endocrinology Advisor app can help parents make better decisions when their child is sick. We want to find out if this app can help make sick days safer for children with diabetes by reducing serious problems like Diabetic Ketoacidosis (DKA). We will also look at how often families use the app, how it affects calls to the clinic, and whether it helps improve things like blood sugar control, hospital visits, and the use of diabetes technology.

A description of this clinical trial will be available on <http://www.ClinicalTrials.gov>, as required by U.S. Law. This Web site will not include information that can identify you. At most, the Web site will include a summary of the results. You can search this Web site at any time.

Information about Study Participants – “Who is participating in this research?”

You are being asked to be a participant in this study because you have type 1 diabetes. This mobile app is an alternative to paper sick day decision support tools already available through our division’s website and available in our clinic.

This study will enroll approximately 1000 study participants.

Information about Study Procedures – “What will be done if you decide to be in the research?”

There are no extra clinic visits required for participation in this study.

Study Procedures - as a participant, you will undergo the following procedures:

You will be granted access to the “Ketone Advisor” option in the “Diabetes and Endocrinology Advisor” application on your mobile device. You will be guided through the app's registration process, during which information such as your child's insulin regimen, age, and weight will be recorded.

Participation includes using the "Ketone Advisor" during any episodes of illness to receive personalized guidance on insulin dosing and other management steps.

The study will track app registration and its impact on various aspects of diabetes management after registration.

The following information will be collected from your medical records (if available) during your participation in this study:

- Subject name
- Date of birth
- Gender
- Race
- Ethnicity
- Primary Site of Care

Title of Study: Utilization of a mobile decision support tool to aid sick day management in children with diabetes.

- Primary Language
- Date of Diagnosis of Diabetes
- Type of Diabetes
- CGM Status
- Pump Status
- Date of App Registration
- The following clinical variables will be recorded for each subject for the 365 days before and after app registration
 - Hemoglobin A1c Values
 - Time-in-range on continuous glucose monitor
 - Number of telephone encounters created in the endocrinology clinic for diabetes related illness
 - Number of diabetes-related visits to the emergency room
 - Number of diabetes-related admissions to Children's Health
- The following will be recorded for each ED visit for registered users
 - Date of ED Visit
 - Initial pH
 - Initial HCO₃
 - Initial Glucose

Application Menu

Upon downloading this app, and whether you choose to complete the registration step or not, you will have access to the complete diabetes education library.

Ketone Advisor

Upon completion of registration, you may activate the "Ketone Advisor" mobile sick-day decision support tool at any time. This tool utilizes the information entered by you at registration regarding your age and total daily dose of insulin, and during an episode of illness, collects further information regarding your glucose level, ketone level and symptoms, to guide you to either call the Endocrinology Clinic or, when indicated, to dose yourself with insulin based on our clinic's sick day protocols.

Information will be collected from both the mobile application and the electronic medical records at Children's Health to assess how well the app supports your child's diabetes care during sick days.

Could your participation end early?

There are several reasons why the researchers may need to end your participation in the study (early withdrawal). Some reasons are:

- The researcher believes that it is not in your best interest to stay in the study.
- You become ineligible to participate.
- Your condition changes and you need treatment that is not allowed while you are taking part in the study.
- You do not follow instructions from the researchers.
- The study is stopped by the study doctor for your site, or by an institutional review board (IRB, an independent group of people who review research to make sure that it is fair and to ensure the safety, well-being, and rights of subjects are looked after).

Risks – "What are the risks of participation in the research?"

Risks from the research

The investigators have designed this study to learn how well the new treatment(s) compare to commonly accepted treatment(s). There is a risk that the effectiveness and/or safety of the treatment for the mobile application users group may not be as good as the most commonly accepted treatments.

Risks from the specific research procedures (drug(s), interventions, or procedures)

Title of Study: Utilization of a mobile decision support tool to aid sick day management in children with diabetes.

Taking part in this study will not affect your care.

The “Diabetes and Endocrinology Advisor” mobile application is a new method of delivering our sick day protocols which are already available in paper format on our clinic’s website and in our clinic notebook (available in person in our clinic).

This study involves the collection of information about you during your routine care. Although all information is coded in a way that your identity will be protected, there is a small risk of possible loss of confidentiality of your medical records information.

We will tell you about any significant new findings which develop during the course of this research which may relate to your willingness to continue taking part.

Are there Risks related to withdrawing from the study?

If you decide to withdraw from this study early, you may do so at any time by deleting your account from within the application.

Are there risks if you also participate in other research studies?

Being in more than one research study at the same time, may increase the risk to you. It may also affect the results of the studies. You should not take part in more than one study without approval from the researchers.

What if a research-related injury occurs?

The researchers have taken steps to minimize the known or expected risks. However, you may still experience problems, even though the researchers are careful to avoid them. In the event of a research-related injury or if you experience an adverse reaction, please immediately contact your study doctor. See the section “Contact Information” for phone numbers and additional information. You may also need to tell your regular doctors.

If you have an injury or illness from the procedures required for this study, medical care will be provided. If your insurance is billed, you may be required to pay deductibles and co-payments that apply. You should check with your insurance company about any such payments.

We have no plans to give you money if you are injured. If you sign this form, you do not give up your right to seek additional compensation if you are harmed as a result of being in this study.

Benefits – “How could you or others benefit from your taking part in this study?”

The possible benefit of your participating in this study is you may benefit from improved guidance during sick days, potentially reducing the risk of severe complications such as DKA. Additionally, the information gathered may benefit other children with diabetes by helping to develop more effective sick day management strategies. There is no guarantee or promise that you will receive any benefit from this study.

Alternative procedures or course of treatment – “What other options are there to participation in this study?”

There are other options available to you. You may receive personalized guidance regarding insulin dosing during sick days by calling our clinic or by following guidelines available on paper handouts and online.

Payments – Will there be any payments for participation?

You will receive no monetary compensation for participation in this study.

Costs – Will taking part in this study cost anything?

Your participation in this study is at no cost to you. Medical treatments and procedures will occur as usual clinical practice and no additional medical treatments or procedures are required for this study.

Title of Study: Utilization of a mobile decision support tool to aid sick day management in children with diabetes.

You or your health insurance company will be responsible for the cost of treatments and procedures that would be done whether or not you took part in this study, such as emergency room care for high blood sugars or ketones. It is important to understand that some insurance companies do not cover some costs (for example, approved drugs used in a way different from the package instructions). If your insurance company does not cover these treatments or procedures, you will be required to pay for them. Ask the researchers if you have any questions about what it will cost you to take part in this study (for example bills, fees, or other costs related to the research).

Confidentiality – How will your records be kept confidential?

Information we learn about you in this study will be handled in a confidential manner, within the limits of the law. If we publish the results of the study in a scientific journal or book, we will not identify you. The Institutional Review Board and other groups that have the responsibility of monitoring research may want to see study records which identify you as a subject in this study.

The Research Team will enter data about you and your health into a computer and a computer program will help the study team decide if you meet requirements to be in this study.

Please initial one of the boxes below to indicate whether you consent to use of the automated processes described above.

I agree _____

I do not agree _____

This research will keep your Study Data for 5 years after this research ends.

The University of Texas Southwestern Medical Center is responsible for the use of your Study Data for this research. The University of Texas Southwestern Medical Center Office of Institutional Compliance (Privacy Office) may be contacted by phone at 214-648-6024 or email compliance@utsouthwestern.edu if you have:

- Questions about this Notice
- Complaints about the use of your Study Data
- If you want to make a request relating to the rights listed above.

Data sharing could change over time and may continue after the study ends.

The use and sharing of your data are required for participation in this research study. If you are not comfortable with the use and sharing of your data in future research without further consent, you should not participate in this study.

How will my information and/or tissue samples be used?

Your personal information and/or biospecimens collected during this study will not be used or distributed for future research studies even if the information is de-identified and cannot be linked back to you.

Research policies require that private information about you be protected and this is especially true for your health information. However, the law sometimes allows or requires others to see your information. The information given below describes how your privacy and the confidentiality of your research records will be protected in this study. Medical information collected during this study and the results of any test or procedure that may affect your medical care may be included in your medical record. The information included in your medical record will be available to health care providers and authorized persons including your insurance company.

What is Protected Health Information (PHI)?

Protected Health Information is information about a person's health that includes information that would make it possible to figure out whose it is. According to the law, you have the right to decide who can see your protected health information. If you choose to take part in this study, you will be giving your permission to the investigators and the research study staff (individuals carrying out the study) to see and use your health information for this research study. In carrying out this research, the health information we will see and use about you will include:

- Subject name

Title of Study: Utilization of a mobile decision support tool to aid sick day management in children with diabetes.

- Date of birth
- Gender
- Race
- Ethnicity
- Primary Site of Care
- Primary Language
- Date of Diagnosis of Diabetes
- Type of Diabetes
- CGM Status
- Pump Status
- Date of App Registration
- The following clinical variables will be recorded for each subject for the 365 days before and after app registration
 - Hemoglobin A1c Values
 - Time-in-range on continuous glucose monitor
 - Number of telephone encounters created in the endocrinology clinic for diabetes related illness
 - Number of diabetes-related visits to the emergency room
 - Number of diabetes-related admissions to Children's Health
- The following will be recorded for each ED visit for registered users
 - Date of ED Visit
 - Initial pH
 - Initial HCO₃
 - Initial Glucose

We will get this information **by looking at your chart at Children's Health.**

How will your PHI be shared?

Because this is a research study, we will be unable to keep your PHI completely confidential. We may share your health information with people and groups involved in overseeing this research study including:

- the members of the local research team.
- The Institutional Review Board, Human Research Protection Program Office and the Compliance Office of the University of Texas Southwestern Medical Center, and other groups that oversee how research studies are carried out.
- The Research offices at the University of Texas Southwestern Medical Center & Children's Health.
- Representatives of domestic and foreign governmental and regulatory agencies may be granted direct access to your health information for oversight, compliance activities, and determination of approval for new medicines, devices, or procedures.

If you decide to participate in this study, you will be giving your permission for the groups named above, to collect, use and share your health information. If you choose not to let these groups collect, use and share your health information as explained above, you will not be able to participate in the research study.

Parts of your PHI may be photocopied and sent to a central location or it may be transmitted electronically, such as by e-mail or fax. The groups receiving your health information may not be obligated to keep it private. They may pass information on to other groups or individuals not named here.

How will your PHI be protected?

In an effort to protect your privacy, the study staff will use code numbers instead of your name, to identify your health information. Initials and numbers will be used on any photocopies of your study records, and other study materials containing health information that are sent outside of Children's Health for review or testing. If the results of this study are reported in medical journals or at meetings, you will not be identified.

Do you have to allow the use of your health information?

Title of Study: Utilization of a mobile decision support tool to aid sick day management in children with diabetes.

You do not have to allow (authorize) the researchers and other groups to see and share your health information. If you choose not to let the researchers and other groups use your health information, there will be no penalties but you will not be allowed to participate in the study.

After you enroll in this study, you may ask the researchers to stop using your health information at any time. However, you need to say this in writing and send your letter to Dr Soumya Adhikari at 2350 N Stemmons Fwy, Dallas, TX 75207. If you tell the researchers to stop using your health information, your participation in the study will end and the study staff will stop collecting new health information from you and about you for this study. However, the study staff will continue to use the health information collected up to the time they receive your letter asking them to stop.

Can you ask to see the PHI that is collected about you for this study?

The federal rules say that you can see the health information that we collect about you and use in this study. Contact the study staff if you have a need to review your PHI collected for this study.

You will only have access to your PHI until the end of the study.

How long will your PHI be used?

By signing this form, you agree to let us use and disclose your health information for purposes of the study until the end of the study. This permission to use your personal health information expires when the research ends and all required study monitoring is over.

Contact Information – Who can you contact if you have questions, concerns, comments or complaints?

If you have questions now, feel free to ask us. If you have additional questions, concerns, comments or complaints later or you wish to report a problem which may be related to this study please contact:

Primary contact:

Soumya Adhikari, MD can be reached at (214) 456-5959.

The University of Texas Southwestern Medical Center Human Research Protection Program (HRPP) oversees research on human subjects. HRPP and Institutional Review Board (IRB) representatives will answer any questions about your rights as a research subject, and take any concerns, comments or complaints you may wish to offer. You can contact the HRPP by calling the office at 214-648-3060.

Research Consent & Authorization Signature Section

If you agree to participate in this research and agree to the use of your protected health information in this research, sign this section. You will be given a copy of this form to keep. You do not waive any of your legal rights by signing this form.

SIGN THIS FORM ONLY IF THE FOLLOWING STATEMENTS ARE TRUE:

- You have read (or been read) the information provided above.
- Your questions have been answered to your satisfaction about the research and about the collection, use and sharing of your protected health information.
- You have freely decided to participate in this research or you are voluntarily giving your consent for another person to participate in this study because you believe this person would want to take part if able to make the decision and you believe it is in this person's best interest.
- You understand that a copy of this signed consent document, information about this study, and the results of any test or procedure that may affect your medical care, may be included in your medical record. Information in your medical record will be available to health care providers and authorized persons including your insurance company.
- You authorize the collection, use and sharing of your protected health information (another person's protected health information) as described in this form.
